Recommended Schedule for well child visits and immunizations: (Combinations will be given when appropriate)

<u>Approximate Age:</u>	<u>Vaccine</u>
Birth:	Hep B
1 month:	Hep B
2 months:	DtaP, Hib, IPV, Pneumococcal, Rotavirus
4 months:	DtaP, Hib, IPV, Pneumococcal, Rotavirus
6 months:	DtaP, Hib, IPV, Pneumococcal, Rotavirus, Hep B
9 months:	Exam only and lead test (if up-to-date on immunizations)
12 months:	MMR, Varicella, Hep A
15 months:*	DtaP, Hib, Pneumococcal, IPV, CBC & lead Test
18 months:	Hep A
2 years:*	Exam only (if up-to-date on immunizations)
3 years:*	Exam only (if up-to-date on immunizations)
4-5 years:*	DTaP, IPV, MMR, Varicella A Well Child Exam is done at ages 4 and 5 years, but immunizations can be given at either exam
6 years and up:**	Varicella #2 (if no history of chickenpox illness or only one dose previously given)
11 years and up:**	HPV9, TdaP, Meningococcal
16 years:	MenB
6 months-18 years:	Flu vaccine is recommended yearly, especially for those with asthma, diabetes or chronic health problems.
*Hep A	If series not completed

The above recommendations are based on current information and recommendations from the Advisory Committee on Immunization Practice (ACIP) and the American Academy of Pediatrics. There have been many changes in the last few years, and this schedule takes those changes into account.

These changes have been made to protect your child as much as possible from disease as well as from complications from the vaccines. We will continue to keep this schedule updated and inform our parents of any changes.
